URGENT ALERT

GENOCIDE NOW?

**Is the Government
planning to force you to have a
WEAPONISED vaccine?**

A “Swine flu” vaccine company (Baxter International) is currently under investigation for possible *deliberate contamination* of flu vaccine. It admitted contamination but claims it was “accidental”.

The drug company Baxter International has been found to have produced a seasonal influenza (H3N2) vaccine that was contaminated with live avian (bird) influenza (H5N1) virus. Fortunately, tests carried out in the Czech Republic identified the problem before the contaminated vaccine was distributed.

The Toronto *Sun* reported that "While H5N1 doesn't easily infect people, H3N2 viruses do. If someone exposed to the two had been simultaneously infected with both strains, he or she could have served as an incubator for a hybrid virus able to transmit easily to and among people."

Baxter International is required to adhere to Biosafety Level 3 protocols which should prevent accidental contamination of vaccines. The fact that this contamination happened strongly suggests that the contamination was either due to gross negligence, or was deliberate.

Was the contamination sanctioned by management in the hope that the

contaminated vaccine would start a pandemic of avian influenza, from which the company could then profit by producing vaccines and other medications?

All indications point in that direction.

Journalist Jane Buergermeister has been researching the story and alleges that the contamination of Baxter's influenza vaccines was deliberate. She has filed criminal charges against the company as well as the WHO and the UN for conspiracy to commit genocide.

The Financial Incentive to Murder

In Europe, the USA and Japan, for example, legislation exists that allows forcible vaccination of the population in the event of the pandemic – a gross violation of human rights. However, from a drug company's perspective, it means that the declaration of a pandemic in these countries is a wonderful financial windfall since the whole population can

be forcibly injected with their vaccine and regardless of whether the vaccine has been proven to be effective or safe.

In fact, in the USA legislation has been recently been passed that gives vaccine makers legal indemnity, making it impossible for people to sue for damages if they (or a family member) suffer from adverse effects – or die – following their injection with the swine flu vaccine.

This vaccine is still in development, has never been adequately tested and is being rushed into production. Even without accidental or deliberate contamination, would you trust the drug companies to look out for your safety?

The Last “Swine Flu”

The last "swine flu" epidemic in 1976 resulted in a large number of recipients suffering severe side effects from the hastily manufactured and untested swine flu vaccine. Prominent among the adverse effects was hundred of cases of Guillane Barre syndrome, a neurological breakdown that can include varying degrees of paralysis.

The temptation for profit-hungry companies such as Baxter to use its considerable resources to create a global pandemic and then profit from it is enormous.

We are fortunate in NZ that the new Epidemic Preparedness Act (2006) does not specifically allow for compulsory vaccination in the event of a pandemic. However, it contains many other clauses that significantly impact on human rights and our customary freedoms that we enjoy in this country.

For example, there is a little known clause in the Health Act which allows the Medical Officer of Health to enlist police to do whatever is necessary to aid in the containment of an epidemic – which could potentially include forced vaccination.

Your life and that of millions of other people could well be at stake here.

This is the most serious and dangerous issue of our times, perhaps in the history of the human race. For make no mistake: There is serious money to be made providing vaccines that could cause chronic disease or even kill people and a “depopulation” agenda has been called for by the Global Elite. They believe that there are “too many people on this planet”. They would probably consider you to be one of the expendables.

According to some observers, the plan is to panic you by releasing a virulent strain of flu (it’s happening now, and will likely intensify within weeks or months). Then when you’re sufficiently panicked, you will be offered the vaccine.

A vaccine that could well be “weaponised” – designed to kill you.

The Baxter Incident indicates that this scenario is not a “remote possibility” but could well be happening NOW. There is no way that the “contamination” could have been an accident. This “incident” should serve as an urgent wake up call to the millions of people who are in the crosshairs.

Jane Buergermeister has done the world a great service by exposing the “Baxter Incident” and then by bringing criminal charges against the perpetrators.

But her efforts must be supported here in NZ.

Ring or email your MP and The Hon Tony Ryall, Minister of Health. Tel (04) 817 6804 or email his office here: <Peter.Maciver@parliament.govt.nz>. Let them know that you know, and tell them that mandatory vaccinations are NOT ACCEPTABLE. And by all means DON’T USE BAXTER VACCINE WHILE

THE COMPANY IS FACING CRIMINAL CHARGES!!!

Please help raise awareness of these issues among your friends, family and colleagues. It would also seem prudent to ensure that you create a family

pandemic preparedness kit (which includes food, water, essential medications, etc) in the event that public services become disrupted due to a substantial burden of illness in the community.
