Earth Changes

Announcements

Signs of the Times

During the cover-up battles over the near presence of Planet X in the inner solar system, the establishment itself has provided some of the very best evidence. NASA has tried in vain to hide evidence of Planet X and its trailing Moon Swirls in its vast charged tail. This evidence showed up so consistently on the SOHO images that posting the latest capture had become almost a daily affair on the [Pole Shift ning](#) blog dedicated to these captures. NASA was obviously loathe to just eliminate this public service, wherein they would produce, live, images taken in various wave lengths every 20 minutes and deliver them almost immediately to the public. Were they to stop this service, surely the public would ask, “what are they trying to hide”? Some attempts to limit the damage have been detailed in this newsletter in [Issue 170](#) where NASA allows its archives to be altered with cut-and-paste so it appears the Winged Globe has been around well before 2003, and in [Issue 197](#) where NASA claims the Sun is causing Earth changes, and in [Issue 202](#) where NASA claims that captures of the Winged Globe or the Moon Swirls are exploding asteroids, and in [Issue 204](#) where NASA is obviously using an eraser.

But NASA is not only contemplating taking the SOHO images offline so the public cannot make their own determination, they took this step. It remains to be seen whether this is the final disposition, as they are, frankly, damned if they do and damned if they don't. The LASCO products, the red and blue images showing the vicinity *around* the Sun, have gaps, a 5 day gap between May 3, 2012 and May 8, 2012 and then a 2+ day gap to May 11, 2012. The EIT images of the Sun itself all stopped at 13:00 UTC on May 3, 2012 and did not return until May 11, 2012. Clearly, SOHO was being halted while the cover-up artists argued behind closed doors. Was this the time to blind the public? And are the returned SOHO showing us less detail than formerly?

IMAGE: [SOHO Gaps](#)

IMAGE: [SOHO Returned](#)

An announcement was posted to explain the sudden outages. Yet there was evidence that the data stream from SOHO was still in operation. The “Emergency Reacquisition” mode for SOHO had occurred once before on June 24, 1998, when SOHO had been in operations less than 2 years, but changes had been instituted so this situation would not recur. And the situation did *not* recur, for these 14 years. In 1998 they had no contact with the SOHO satellite for more than 1 month and 3 months passed before SOHO was back in operation. Per the Zetas, this time there was nothing wrong with the SOHO satellite. The issue was the direction the cover-up was to take, as the battle over the cover-up had intensified, and polarized.

NOTE: LACK OF DATA UPDATES.

<http://sohowww.nascom.nasa.gov/dataarealtime-images.html>

SOHO went into "Emergency Sun Reacquisition" mode on Friday May 4, 2012, caused by a false trigger of the Coarse Sun Pointing Attitude Anomaly Detector. We are working on the recovery of the spacecraft to normal mode. Nominal science operations should be re-established in the next couple of days.

SOHO - A Diary of the Recovery

http://sohowww.nascom.nasa.gov/operations/Recovery/recovery_diary.html

On August 31, the SOHO Mission Interruption Joint ESA/NASA Investigation Board released its final report. It concluded that the chain of events leading to the interruption of contact with the SOHO spacecraft, which was described in its preliminary report, was correct, and it recommended, in order to prevent similar mishaps in the future, that ESA and NASA review and correct the S/C ground procedures, the procedure implementation, the management structure and process, and the ground systems. No fault on the spacecraft contributed to the mishap.

ZetaTalk [Comment](#) 5/10/2012: *Is the SOHO satellite in trouble? The much accessed LASCO images in red and blue have been eliminated, while the close-ups of the Sun that support NASA's claims about sunspots and solar flares are still available in some format. Is the SOHO satellite damaged, malfunctioning, or in need of adjustment? There is nothing amiss with the SOHO satellite, and it is still streaming data. NASA is using an old excuse from 1998 to explain why they are no longer providing images to the public. Changes were made to the programs that control the SOHO satellite after the 1998 incident, to prevent a repeat, but this is brushed aside as they need some excuse for withholding the images from the public, who of course PAY for the entire NASA operation with their taxpayer dollars. What changed? Polarization in the cover-up war has intensified.*

But SOHO problems were not the only clue that the public was to be blinded. The images of the Earth's magnetosphere - which so clearly showed that a magnetic presence had the Earth in its grip - had been halted. NICT, the [Magnetic Simulator](#), had its life support ended due supposedly to lack of funding! Other sources that could be used to image the Earth's magnetosphere were also being pulled, by restricting access.

End of Web Service

<http://www.nict.go.jp/en/terminated-web-service.html>

The NICT Real-time Space Weather Simulation Service ended at the end of March 2012 because the lease period of the supercomputer for the real-time simulation expired and because a supercomputer for the real-time service will not be immediately available. We plan to develop more accurate and practical space environment models, hoping to be able to resume the real-time simulation in the near future.

SOLAR & ASTROPHYSICS LABORATORY

http://www.lmsal.com/solarsoft/last_events/

You don't have permission to access /solarsoft/last_events on this server.

We had noted in [Issue 293](#) of this newsletter that the twisting magnetosphere was an “elephant in the room”, an embarrassment to the cover-up. The establishment shut down the Magnetic Simulator at the end of March, 2012. But not before a dedicated member of the [Pole Shift ning](#) had charted the increase. Per the Zetas, the battle of the cover-up has polarized and intensified! Look at the timing! The media exposed the presence of Planet X on the SOHO images on March 27, 2012, when both the Daily Mail and [Huff Pro](#) featured the Check Mark Moon Swirl. Not a month later, SOHO was taken off line, revealing a clear internal struggle in the cover-up.

IMAGE: [Magnetosphere Chart](#)

ZetaTalk [Comment](#)5/10/2012: *Images from the NICT Magnetic Simulator were already halted at the end of March, 2012 because it so clearly showed a magnetic presence other than the Sun twisting the Earth's magnetosphere. And if the media dare feature their SOHO images showing the Checkmark Moon Swirl, as they did on March 27, 2012, then what can be coming next? They will likely return with changes that require them to withhold the images for a longer period, to allow proper elimination of any evidence of the Planet X complex. Fewer images, more carefully edited.*

Polarized Cover-up

If the establishment has taken steps to blind the public while the media is beginning to do the opposite, what is the result? Per the Zetas, a polarized cover-up. It has become open warfare. In the past, astronomers likely to break the cover-up were quietly killed, so it looked like an accident.

ZetaTalk [Statement](#)2/15/2000: *Look at the secrets that have been muzzled so far - JFK, where a single bullet was supposed to have traveled through several bodies. Who believes that? Nevertheless this is the official explanation, and those who know better are either silenced, kept quiet by their personalities and their sense of duty and their desire to be part of the structure, or killed. And it has happened also, with Planet X that a number of people have been killed. And these kinds of deaths ripple through the community that is aware of this, so it is a harsh reminder that they too should keep their mouth shut.*

ZetaTalk [Analysis](#)12/4/2004: *The greatest fear a cover-up has is an uncontrolled unraveling. The cover-up is primarily a desire to use the passage of Planet X as an opportunity to come out on top of the pile when the dust settles, to control people and assets, to destroy opposition and seize control, to place a restless public into a slave labor status during the turmoil, and thus, emerge as kings. At best, perpetrating the cover-up was to retain perks and status and pay for as long as possible. Participation in the cover-up was a demand, expressed as a national security issue to damp panic and protect the public safety.*

But the gloves have come off with the recent assassination of a Japanese astronomer working on the [Atacama Large Millimeter Arrays](#) (ALMA) radio telescopes in Chile. In a highly suspicious assault, where the police did not even note a head injury, Koh-Ichiro Morita was pronounced dead 6 hours after being taken to the hospital. Per the Zetas, this was a loud warning to any other who might be inclined to break the long-standing cover-up over the presence of Planet X in the inner solar system. Per the Zetas, Morita declined protection from the Council of Worlds, choosing instead to become a martyr in the cover-up wars.

IMAGE: [ALMA Setup](#)

Japanese Astronomer Found Dead in Chile

May 8, 2012

<http://tv.ibtimes.com/japanese-astronomer-found-dead-in-chile/5489.html>

Koh-Ichiro Morita was found still alive outside his apartment at around 2 am morning reportedly with an injury to

the head. He died nearly six hours later at a nearby hospital. Investigators have not yet determined the cause of death. Local reports indicated Morita did not have visible injuries, though a medical report supposedly mentioned a brain injury. Morita worked the past two years at the Santiago headquarters for the Atacama Large Millimeter Array (ALMA) in Chile's northern Atacama Desert.

ZetaTalk [Expose](#)5/12/2012: *Lately the cover-up has gotten vicious and forceful, as they sense they are about to lose the battle. Morita was one member of the community who was restless, and did not like being ordered into silence on a matter so vital to the inhabitants of planet Earth. His death was sent as a message to others of like mind. The battle over the cover-up is becoming more polarized. Morita's death has been announced as brain damage from a blow to the head, but as news articles show, this was not evident when he was found, unconscious, nor is it logical that he would be in hospital for 6 hours yet not be saved. The skull is opened to relieve pressure if bleeding is present. He was slipped a poison, ingested prior to returning home, where he collapsed before getting to his apartment. This was not enough to kill him, a botched job, so he was finished off in hospital.*

Sunda Crunch

The 7 of 10 scenarios detail how the hapless Sunda Plate will be pushed down and under the curve formed by Sumatra and Java, the plate bending through southern China to allow this push down and under. The Zetas have also provided detail about an accordion fold, the Sunda Plate squeezed from the side so that folds emerge, land rising in some places and dropping in others.

ZetaTalk [Prediction](#)10/16/2010: *The large islands of Indonesia and the Malaysia are riding on the tongue of the Eurasian Plate. These will all suffer when the plate movement that will push some islands in Indonesia down, many small islands, and the coastlines of larger islands, will experience a loss of sea level.*

ZetaTalk [Explanation](#)10/16/2010: *Note the mountainous regions to the east and west of the valley in central Thailand. We have mentioned that when a plate tilts, rising one side and sinking on the other, that this plate may bend where the plate is thin. The tongue holding Indonesia is certainly under such a squeeze. As the tongue is pushed together, the eastern portion pushed toward the west, the valley in central Thailand is buckling, being pushed down. Simultaneously, a new seemingly volcanic island appeared between eastern Java and Bali, where the tongue is under pressure as it is being pushed down under the curve of the Indo-Australian Plate.*

But is there more? The pressure against the Sunda Plate will not ease, per the Zetas, just because their role in the 7 of 10 scenarios has passed. It will be unremitting until the Pole Shift. What this is doing for lands in and around the Sunda Plate is

creating what can best be described as a crumble. Not earthquakes. Not floods. Not volcanic eruptions. Not tsunamis. But crumbling ground – splitting open, heaving, and often, due to the pressure, smoking! Recently a smoking crevasse appeared [high in the Himalayas](#), proving that a thick crust does not protect one from the heat of rock compression. Now this situation has appeared in Thailand and Sri Lanka.

IMAGE: [Fire Pits](#)

High Temperatures Setting off Fires Underground

April 26, 2012

<http://www.nationmultimedia.com/national/High-temperatures-setting-off-fires-underground-30180733.html>

Initial examination suggested that methane from accumulated sawdust, weeds and dry leaves as well as heat might have caused the fire. Fire has reportedly been raging underground. The fire has also reportedly burned four dogs to death.

Mysterious Flames Erupt from Earth

May 4, 2012

<http://www.adaderana.lk/news.php?mode=head&nid=1228>

A large crowd flocked to see flames and smoke which mysteriously appeared from a hole dug up in Turai Adi in Kinniya. Police and army personnel were deployed to the location to control the crowds after a tense situation had ensued.

ZetaTalk Comment 5/12/2012: *The region in and around the Sunda Plate is under intense pressure lately, and this state will continue until the Pole Shift. We have mentioned that the Indo-Australian Plate is a brake, holding other plate movement around the world back. When it gives, there is a domino effect around the globe as other plates then find themselves free to move. Recently a smoking crevasse appeared in the Himalayas, and this type of pressure on rock, which creates heat, will occur elsewhere in the world on occasion too. The Sunda Plate is being pressed into the curve that curls under Sumatra and Java. Thailand is being directly compressed with great pressure from the Pacific and the tilting Philippine Plate. This is not heat from molten lava, not volcanic heat, but heat from compressed rock.*

The Pole Shift thing has many blogs with reports from [China](#), [Thailand](#), [Viet Nam](#) and other countries in and around the Sunda Plate showing that the crunch is on. In China the crumble is blamed on rain, but can rain create such distinct crevasses? This is the bend point in China, a weak point in the China crust which bends when the Sunda Plate is tipped

down.

Land Collapse in Seven Shan, Yongdeng, Lanzhou, Gansu Province (Amur Plate)

May 8, 2012

http://www.greentv.com.cn/zhuanti/zhuanti_detail.aspx?ID=94042

The heavy rain resulted in seven township farmland collapse.

The Storms Yongdeng 3839 People Were Affected

May 8, 2012

<http://125.75.128.177:8000/html/xwdt/201205082008204917.html>

The direct economic loss of 28.656 million yuan. Rescue and relief work in full swing.

Guangxi Liuzhou Villages in the Geological Collapse

May 10, 2012

<http://insidechina.onehotspots.com/guangxi-liuzhou-villages-in-the-geological-collapse>

Two factories and a residential building in a serious collapse. Hundreds of people have been evacuated. But the exact cause has yet to be authoritative departments for investigation.

Thailand is crumbling in soaked land along canals. If this were the normal situation, then why has it not occurred before?

Why *now*?

IMAGE: [Thailand Crumble](#)

Propene Gave the Break Point

May 8, 2012

<http://www.oknation.net/blog/print.php?id=801206>

The road along the canal (west coast) fell down to 1.5 -2 meters and 100 meters in length in different parts.

The Dam Collapsed - Settlement Road

April 17, 2012

<http://www.dailynews.co.th/thailand/22664>

In mid of April subsided the road with the dam in Pho Thong, Ang Thong.

Bangkok Continues to Fall Apart

April 4, 2012

<http://www.bangkokpost.com/learning/easier-stuff/287414/bangkok-continues-to-fall-apart>

On April a section of a footpath collapsed after land beneath it subsided along the banks of the canal. The subsidence created a hole 3m deep, 5m wide and 22m long.

Flash Flood Warning Issued in 15 Provinces

May 8, 2012

<http://www.bangkokpost.com/lite/news/292263/flash-flood-warning-issued-in-15-provinces>

A 300-metre section of the Den Chai-Lampang road between the 36th and 37th kilometre markers collapsed in Phrae's Long district.

Viet Nam has been affected by more than the soaking that comes from sinking. The land is frankly crumbling, and no excuses offered by the government.

IMAGE: [Viet Nam Crumble](#)

Land Subsidence Abnormalities in Cam Pha, 3 Houses Collapsed

May 10, 2012

<http://www.zing.vn/news/xa-hoi/sut-lun-dat-bat-thuong-o-cam-pha-3-nha-dan-sap-do>

The provincial authorities and relevant sectors are investigating the cause of the land subsidence. A hole around 1.5m deep and 3-5m wide first appeared before expanding to more than 4m deep and 10m wide.

Many New Cracks at the Disposal Phan Me

April 19, 2012

<http://thuvienphapluat.vn/tintuc/vn/thoi-su-phap-luat/thoi-su/2867/nhieu-vet-nut-moi-o-bai-thai-phan-me>

The cracks about 20cm wide, even up to 35 cm segments, forming deep pit.

Ninh Binh: Highway 1A was "Split Pairs"

February 13, 2012

<http://laodong.com.vn/Xa-hoi/Ninh-Binh-Quoc-lo-1A-bi-xe-doi/43294.bld>

According to our observations, seriously degraded the road, long sink marks, cracks nearly 10cm wide, tens of meters long, raised a "wave" on the road and is showing signs of continued subsidence serious.

Elsewhere on the Sunda Plate, in the Philippines, Malaysia, and Java, crumbling also is occurring, for no ostensible reason. The pressure on the Sunda Plate is consistent, throughout.

IMAGE: [Sunda Outline](#)

Philippines: Quinapondan Bridge Approach Collapses; Bridge Closed to Traffic

May 5, 2012

<http://leytesamardaily.net/2012/05/dpwh-quinapondan-bridge-approach-collapses-bridge-closed-to-traffic/>

An approach of a bridge under rehabilitation in Quinapondan, Eastern Samar has collapsed, leaving the Samar South Coastal Road impassable to all types of vehicles.

Malaysia: Welcome Occupied Pandan Heights Luxury, Made To Repair Work

May 6, 2012

<http://www.selangorku.com/?p=7381>

Luxury Pandan Heights residents can heave a sigh of relief when a landslide that occurred near the drainage canal near block 5, the condominium is not detrimental to the building structure.

Java: Monday Lebak Bridge Collapse, Two Isolated Village

May 7, 2012

<http://www.pikiran-rakyat.com/node/187566>

Bridge with a length of 13 meters and 5 meters wide on the two sides broke contact with the road.
