Wishful Thinking

Early in the ZetaTalk saga the Zetas were asked about the concept that one could simply wish positive thoughts, and one might even be able to ascend into the next density, escaping the mess that humans today are not able to avoid cancer or disease, tornadoes, lightning strikes, earthquakes, starvation. The concept gains converts because it offers escape. Like Dorothy in the Wizard of Oz, home merely by clicking her heels together three times while wearing the magic red shoes.

ZetaTalk [Comment](#) 2/15/2003: *Many humans who are currently supported in their physical communities are aghast at the prospect of being thrown on their resources in the Aftertime. The world, and in many towns fringed by farming communities, are utterly unfamiliar with step-by-step change. Thus, New Age talk about the world evading the pole shift if all hold hands and fervently wish for their ways and become Service-to-Others overnight, are popular with these folks. They simply don't know where else to start, and the road seems too long for them to walk, otherwise. Of course, none of this is explained. It is a palliative, a tranquilizer, to be taken so one does not worry until the last minute. How do you avoid thinking about it, or comfort yourself with a fairy tale, then so be it, but rescue will not come today, to those starving stick children in Africa? Does it happen today when a Cyclone roars over families and sweeping the housing out to sea? Does it happen today to those dying in agony because insects have put parasites into their eyes, mass disease ignored by comfortable industries?*

Wishful thinking goes so far as to suggest that one may escape into another density. Poof, you're gone into a type of heaven, just like that. This idea was promulgated in the book The Celestine Prophecy.

The Celestine Prophecy

http://en.wikipedia.org/wiki/The_Celestine_Prophecy

In the novel, the Maya civilization left ruins in Peru where the manuscript was found, with a residence in the abandoned Maya cities after the Maya had reached an "energy vibrational barrier" and crossed a barrier into a completely spiritual reality.

The issue came up again during the weekly Q&A chat, in a question about the Cassiopeian Field.

Cassiopeia Project

http://www.cassiopeiaproject.com/open_pdf.php?Clip_Name=Chapter_10-Dimensions

As he did in sending Kevin on his way, the technician interacts with the controls, and an energy field envelops them. Through the light you can barely make out a tube opening up like the one you saw before. Then their clothes become transparent and disappear, followed by the melting of the floor experienced before. Then they are gone! The light slowly fades and the room returns to normal.

These concepts, that one can make their reality, wish away nasty stuff, and learn to switch densities, have been around for a long time.

What is Unity?

<http://www.unity.org/aboutunity/index.html>

Unity emphasizes the creative power of thought in our life experience. We refer to this as the Creative Mind. When we take personal responsibility to choose life-affirming thoughts, words and actions, we create a fulfilling and abundant life.

What we Believe

http://www.unitedcentersforspiritualiving.org/Philosophy/phil_beliefs.php

We are surrounded by this Creative Mind which receives the direct impress of our thoughts. We believe in the healing of the sick through the power of this Mind. We believe in the continuing power of this Mind.

The Power Book

<http://thesecret.tv/thepower/>

Perfect health, incredible relationships, a career you love, a life filled with happiness, and everything you want, all come from The Power. The life of your dreams has been waiting for you, but you didn't realize it, because The Power - to have everything good in life - is inside you.

Per the Zetas, such clinging to an imaginary escape will only increase as the Earth changes in the coming years. Be on the upswing.

ZetaTalk [Comment 3/19/2011](#): *What is the purpose of such organizations as the Cassiopaeic Ascension into 4th density to avoid the pole shift is possible. If this were possible, then surely the media attends an Ascension, an escape into 4th density, and those adhering to the Cassiopaeic thin air in front of the cameras. Prove it, is our statement! They have zero credibility, a zero rating on any of their pronouncements. Why is such a ridiculous theory even contemplated by the public and won't be the last such ridiculous belief that will arise as the Earth changes become more converts. Close your eyes, click your heels together, and make a wish! Like Dorothy, wanting Dorothy needed was the knowledge and some red shoes! Enter the Cassiopaeians!*

Indonesia Reality

Contrast armchair wishful thinking with the reality being experienced by those on the Sunda holding Indonesia. This has been sinking in steps, since December 23, 2010 and is in the final stages. The stoic Indonesians have only recently begun looking worried or expressing dissatisfaction in their response. Their lands have been heaving and cracking. Rivers rising even without rains in the wade along streets or take to boats. The sea roils and crashes, as the Zetas predicted it would, to sea and are without a source of income. Rice fields are flooded with sea water, ruining the crops. Routes, travel on roads diverted, school exams taken in flooded classrooms, and throughout all photos is helping hands. Children and the elderly being carried or ferried.

Sinking, particularly in Java which is the sinking edge of the plate tongue holding Indonesia, is shown in [articles](#) showing the status since March 17, 2011 show. Of note is an admission by those in charge.

Bonjonegoro. They admit the level of the Solo in their town is at 13 meters above sea level, but Solo being long, flowing slowly, and not having a high head. Note that after sinking to the 40 would not be able to drain into the sea. It would meet the sea.

Solo Alert Status Red

March 29, 2011

<http://www.mediaindonesia.com/read/2011/03/29/213952/127/101/>

Watershed in Kota Solo Bojonegoro, East Java, in red alert status, because the water level is above sea level. Director of Planning and Development Engineering said the flooding is due to overflow of river Lamong, and not because of overflow Solo. He explained that the flood is downstream Solo because local topography through which the river along the 600 kilometer altitude of only 135 meters above sea level. As a result, water often pooled in downstream and does not quickly flow into the sea.

Flooded Classroom, Elementary School Students Still Learning at Lamongan

March 29, 2011

<http://us.surabaya.detik.com/read/2011/03/29/112240/1603501/475/>

Flooding is still soaking some areas due to overflowing creeks Lamongan Solo. In addition, a number of primary schools also affected. One of the places that flooded education is ... time. Floods in the school yard range 40 cm height was also reaching into the classroom. The teaching and learning activities are not excluded. As a result, the students learn in a difficult course, these conditions are very disturbing.

It She Transfers the Northern Gaza in Lamongan

March 28, 2011

<http://news.okezone.com/read/2011/03/28/340/439550/ini-dia-pengalihan>

Anticipating congestion on the northern route, Gresik, Tuban, East Java, which is getting worse on the northern axis Lamongan diverted through the three points. In addition, the condition is so the water can not flow smoothly into the sea.

Also of note is the sudden sinking in the Thailand neck on the Malay peninsula. Though this is a note that *all* of the flooding is occurring in areas along coastlines, and in the red, the regions that sink this Thailand neck to sink 60 feet. Why aren't the inland lake regions affected by the flooding?

Southern Thailand Flood Worsening

March 29, 2011

<http://www.bernama.com.my/bernama/v5/newsgeneral.php?id=574732>

Narathiwat became the latest province being flooded apart from seven other provinces: Surat Thani, Phattalung, Trang, Chumporn, Songkhla and Krabi. a total of 979,665 people affected by the flood that hit southern Thailand.

Food Prices Rising

Whether due to a lack of foodstuffs (demand setting the price) or rising oil prices or government intervention on the rise. The UN warns that rising oil prices will push food prices higher. Oil is used to produce and distribution of goods requires fuel.

Food Prices Hit Highs as Oil Rises

March 4, 2011

<http://www.news.com.au/business/food-prices-hit-highs-as-oil-rises/>

World food prices have hit new records and oil price spikes could push them even higher, warned as unrest in the Middle East and North Africa hits markets. The Food Price Index monthly price changes for a variety of key staples, rose to 236 points in February from UN's Food and Agriculture Organization (FAO) said. It was the highest level since FAO 1990.

Price controls or quotas can sometimes backfire. When the price is set too low farmers may produce less. This happened recently in the Ukraine. Even with price controls, the shortage of wheat was apparent.

Restrictions on the Sale of Food are Imposed in the Capital

February 7, 2011

<http://www.epravda.com.ua/news/2011/02/7/270002/>

Buyers say that supermarkets are not only limiting the sells of groats, but also pasta, vegetable products that are sold at below average prices. In particular, buckwheat is sold no more than 3 kilos, and pasta - no more than 3 kilos. The publication notes that by this government is trying to avoid the purchasing boom in the stores and to avoid hoarding the cheap products. However, these requirements, and sell products at different price.

Flour Repeats the Fate of Buckwheat

February 17, 2011

<http://www.epravda.com.ua/news/2011/02/17/272137/>

Companies cannot raise prices for their products because of the strict state regulation, which increases due to rising prices of grains. Some companies (mostly - small) have stopped selling flour in small lots and mostly to permanent partner situation in the market was with buckwheat.

The weather continues to create crop shortages. In the US, for instance, the combination of drought and freeze in March are affecting harvests.

Drought a Major Concern for US Crops This Spring

Mar 4, 2011

<http://www.accuweather.com/blogs/news/story/46472/spring-2011-forecast-drought-a.asp>

Drier-than-normal weather persisting this spring will cause the drought to intensify in the spring and spread northward during the course of the season. This could have a major impact on wheat yields throughout western Texas and far western Oklahoma. Dry conditions this winter have cut wheat crop in western Texas, which yields approximately 5 percent of the nation's hard wheat.

Farmers Worry as Unusually Cold Temps Grip Calif

Feb 27, 2011

<http://www.kboi2.com/news/business/117014143.html>

Almond, peach, plum and other tree fruit farmers in the Central Valley were trying to avoid a hard freeze - when temperatures fall below 28 degrees for three to five hours. Almond, peach and plum trees that are in bloom are most vulnerable to freezing temperatures. Kelley said about 35 percent of the state's almond crop - valued between half a billion and a billion dollars - was in bloom. California produces about 90 percent of the nation's supply of almonds.

The Zetas have long predicted, since the start of ZetaTalk in 1995, that food shortages would shift approached.

ZetaTalk Prediction 7/15/1995: *Going into the cataclysms the weather will become unpredictable rainstorms where not expected, and droughts likewise where not expected. Extremes of temperature. Unusually warm winters, where the trees and shrubs will start to bud, thinking spring, and then frost. Similarly, frosts will come late in the spring, almost into summer, killing the buds which have tender shoots. Where today the world balances these situations, shipping produce around the world coming close to the time of the reappearance of Planet X all parts of the world will experience*

This was covered in 2007 in [Issue 55](#) of this newsletter, and again on April 6, 2008 in [Issue 71](#). A rice shortage created panic worldwide, and again on February 15, 2009 in [Issue 120](#) of this newsletter. We warned of a worldwide crisis, a catastrophic drop in food production looming. Riots are predicted in the UK, due either to high prices or lack of food in the stores. The Zetas have predicted that this is being presented to the public, in the main - empty shelves. The solution, of course, is family gardening during the gardening season throughout the northern hemisphere. Good seeds? Know how to [save your c](#) survival!

ZetaTalk Prediction 6/26/2010: *Though governments have not been admitting it, their stores are low. The issue raised its head on occasion in 2007 and 2008, and the UN reported that wealthy countries are turning their backs on starving nations to the extent that they did formerly. This matter will not be frankly admitted. Governments start to starve, and there are not enough stores of cheese and rice and beans to distribute. All governments will impose price freezes so the populace can still purchase what food there is available. But that the public will simply find the shelves empty, nothing to buy, before they realize the full extent of the crisis.*
